FOR IMMEDIATE RELEASE

SALAMANCA, NY BASED MONROE TABLE COMPANY AWARDED CONTRACT FOR DINING TABLES AND RELATED FURNITURE FOR JAMESTOWN COMMUNITY COLLEGE'S NEW CYBER CAFE.

Monroe Table Company, founded in 1908 in Colfax, Iowa and recently reestablished in Salamanca, NY, has been awarded a contract to supply tables, counters, and modesty partitions for the new Cyber Café at JCC's Jamestown campus. The material being used is a unique phenolic board that is extremely durable and available in a wide range of colors and patterns, and can even be manufactured with logos or custom designs. Monroe worked with JCC designers to come up with a color and pattern that best complimented the chairs, walls and floor colors.

Monroe has also recently supplied dining tables to Ellicottville Brewing Company's new Bemus Point restaurant, Monroe Street Brick and Brew in Ellicottville, The Home Plate in Olean, Myers Steak House in Salamanca and others.

Monroe also produces a line of furniture called Duraguard, using the phenolic board manufactured by the Bradford, Pennsylvania company, Werzalit of America, Inc. This furniture is geared towards the Behavioral housing market but lends itself to many other areas where extreme durability is needed. In addition to being durable, it is fire resistant, bed bug proof, tolerant of almost any clean agent, water proof, and remediation tolerant. The Springfield Illinois SPARC behavioral health housing are using Duraguard furniture exclusively in their many homes.
